EXPERIENCE

Ecommerce - Clothing store   *03/2022 - 05/2023*
Frontend developer

• Load and filter products from JavaScript through categories.
• Add products to the cart by calculating the amount of added products, their quantity, individual price and subtotal.
• Creation and maintenance of Git and GitHub repositories.
Technologies: HTML, CSS, JavaScript.

DEMO   REPO

Construction area app   *10/2022 - 03/2023*
Frontend developer

This app calculates the area of land and buildings. Users can enter the length and width of the plot in different units (meters or centimeters).
• The "Plot" section displays a box that snaps to the dimensions entered by the user to graphically represent the area being calculated.
• Creation and maintenance of Git and GitHub repositories.
Technologies: HTML, CSS, JavaScript.

DEMO   REPO

Add Emails app   *10/2022 - 03/2023*
Frontend developer

• Add and store users by validating the email address to the corresponding fields.
• View and edit users in the table listing all registered users. • Allows you to delete the corresponding user from the table.
• Creation and maintenance of Git and GitHub repositories.
Technologies: HTML, CSS, JavaScript.

DEMO   REPO

Drum machine music app   *10/2022 - 03/2023*
Frontend developer

• Keyboard support allows the playback of a drum sound. • Interactive interface, allows the reproduction of a variety of drum sounds according to each button.
• Provides descriptive information with phrases related to the drum sound, which represent each button.
• Creation and maintenance of Git and GitHub repositories
Technologies: HTML, CSS, JavaScript.
